MEMORANDUM FOR: Chief, B305 Division/PO432/SFO, NSA

25X1A

ATTENTION: [REDACTED]

FROM: Chief, CIA/PID (NPIC)

SUBJECT: Search for Radar System, Tokaj Area, Hungary

REFERENCES: (a) Requirement NSA/PO432/R101-63  
(b) CIA/PID Project C 1802-63

1. This memorandum is in response to your requirement dated 17 December 1963 requesting a search of the Tokaj, Hungary area for a possible AMM guidance and acquisition radar system.

25X1D

2. A search of [REDACTED] photography [REDACTED], reveals clearing and new construction at two locations. The purpose of the construction is not known; however, the two sites appear to be connected by a possible power trace and are probably related to one another.

The first and most prominent of the two sites is located on the point of a hill at 48-07-10N 21-23-00E, approximately one nautical mile west of Tokaj and approximately one nautical mile east of Tarcol. A light tone indicates a clearing and leveling of the top of the hill, and a shadow indicates a structure with height and size. The light tone on the sunward side of the structure gives the appearance of a curved pattern with the concave side facing west.

The service road to the installation originates at Tarcol, and meanders up the north slope of the hill. A possible wire line or power trace between Tarcol and the installation, runs up the west slope of the hill. A second possible wire line or power trace can be seen running down the northeast slope to a point near the river north of Tokaj, where the wire crosses to the opposite bank where the second installation of unknown purpose is under construction.

25X1D

Negation of the installation on the top of the hill can be made on [REDACTED] and negation of the construction by the river on [REDACTED]
